Sprint Goals :

We are working on a legacy project, which was found to have 0% cucumber coverage and < 80% rspec and jest coverage.

As per discussion with professor and clients, we will focus majorly on bringing the test-case coverage > 90% this sprint and work on 1 new enhancement.

The user stories are presented below:

1. **Cucumber features for Admin paths**

As a developer,

I want the Admin scenarios to > 90% coverage in cucumber,

So that when a producer uses the platform, they can scout talent and discuss with clients as expected.

Assigned To : Rahul Baid, Alea Nablan   Points: 3

2. **Cucumber features for Client paths**

As a developer,

I want the Client scenarios to > 90% coverage in cucumber,

So that when a client user the platform to get check events, they can review talents and work with producers as expected.

Assigned To : Milad Saadat, Fatemah Zare   Points 2

3. **Cucumber features for User paths**

As a developer,

I want the User scenarios to > 90% coverage in cucumber,

So that when a talent uses the platform to get scouted, they can share their information and get paid seamlessly.

Assigned To : Harsh Shah   Points 2

4. **RSpec Coverage on Legacy Model and Controllers Codebase**

As a developer

I want to have > 90% RSPEC coverage on legacy codebase

So that we can guarantee the legacy controller logic is working as expected and new changes do not break the existing features.

Assigned to : Rituparna Mandal   Points : 2

5. **JEST Coverage on Legacy UI Code**

As a developer

I want to have > 90% JEST coverage on legacy UI code in the codebase

So that we know the UI logic is working as expected and new changes do not break the existing features.

Assigned To : Shweta Kumaran   Points : 2

6. **Fix CI Pipeline**

As a developer

I want to have a CI pipeline that correctly tests the code before merged

So that I do not have to spend resources on doing it manually and we can ensure new code does not break any existing cases.

Assigned To : Rahul Baid   Points: 1

7. **Admin-Talent DM functionality with selected multiple talents**

   As an: Event admin

   I want: To select multiple talents who have submitted forms for an event, open a chat window, and send a message to them

   So that: I can communicate event details and coordinate efficiently with the selected talents
   Assigned To : Jose Salazar   Points: 2

MockUps

We present 4 mockups for stories 1, 2, 3, and 8 respectively.

Mockup 1 - Story 1 : Cucumber coverage for Admin Scenarios

**The following diagram represents the scenarios we will be validating under this story**

Mockup 2 - Story 2 : Cucumber coverage for Client Scenarios

The following diagram represents the scenarios we will be validating under this story

Mockup 3 - Story 3 : Cucumber coverage for User Scenarios

The following diagram represents the scenarios we will be validating under this story

Mockup 4 - Story 7 :

The following screen mockups (2) for the DM feature between Admin(Producer) and multiple users(talents)
